DETAILED ACTION

1. The preliminary amendment filed on 12/3/2004 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Satoru et al. (10-137638).

Satoru et al. disclose a reciprocating pump type spout unit in which a reciprocating pump (4) is mounted on the mouth of a container (2), a piston (43) of the reciprocating pump is pushed in to increase the pressure in a pressure chamber (42) to blow out the content in the pressure chamber, and canceling the pushing-in of the piston to lower the pressure in the pressure chamber, and an inlet valve (46) is opened so that the content in the container is sucked up into the pressure chamber, wherein the reciprocating pump is mounted on an adaptor (33), and the peripheral edge of the adaptor is mounted on the mouth of the container by being fitted thereto as seen in Figures 1-3.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tritsch 5,460,300, Meshberg 6,382,463, Meshberg 6,817,488 and Reich et al. 5,249,713 disclose other types of reciprocating pump.
